RE: Claim Electronic Data Interchange (EDI) Release 3.1.4 Testing – January 12, 2023, through July 24, 2023

The Texas Department of Insurance, Division of Workers' Compensation's (DWC's) data collection agent, Verisk, is now open for testing for Texas claim EDI release 3.1.4.

All insurance carriers or their designated agents must complete testing before filing production or live Texas claim EDI release 3.1.4 reports starting July 26, 2023. The detailed test plan, technical information, and implementation timeline are at <https://txdwcedi.info/impl-info>. DWC will notify insurance carriers when they are granted approval to file production claim EDI release 3.1 reports.

Insurance carriers that designate an EDI vendor to file claim EDI on their behalf will not be required to individually complete testing. In these cases, the vendor will complete the test plan. When the EDI vendor is approved for production, all their registered insurance carriers will also be approved for production.

Small insurance carriers that choose to report claims using Verisk's web entry portal are not required to test.
